

## Appendix C: Supplementary Tables

The tables in this appendix provide information on key fiscal indicators at the Australian Government, state government and the consolidated level.

The consolidated level described in this appendix comprises the Australian Government, state and local governments and the multi-jurisdictional (universities) sector. Adjustments are made to avoid double counting between these sectors. Due to inter-sectoral transfers, the non-financial public sector (NFPS) does not always equal the sum of the general government and public non-financial corporations (PNFC) sectors.

The Australian Bureau of Statistics (ABS) publishes consolidated figures for all levels of government in its Government Finance Statistics (GFS) release up until 2019-20. Some adjustments have been made to include the Australian Government historical series rather than the Australian Government figures published by the ABS. These figures are used as the base for the consolidated figures in this Appendix.

The ABS GFS consolidated figures are used as a base and grown by GDP. Where available, adjustments have been made to take account for Australian Government Budget estimates as well as state estimates from the most recent state budget updates. A further adjustment has also been made to the revenue and expense figures in Table C.1 to C.3, to account for Australian Government Budget estimates of payments to the states, local governments and the multi-jurisdictional sector.
